GET YOUR HANDS DIRTY!

Healthcare professionals work overtime to help save lives every day, and sometimes these jobs mean getting their hands dirty!

Let’s face it—you really can’t avoid it. From bedpans to patient bedsides, many hands come in contact with numerous surfaces throughout the day, increasing vulnerability to a plethora of bacteria. Without regular hand washing, sanitization and environmental awareness, the transfer of bacteria can put patients at risk.

PDI HAS YOU COVERED:

SANI-HANDS® Instant hand sanitizing wipes

SANI-CLOTH® Disinfecting wipes

EASY SCREEN® Compatible touchscreen cleaner

SANI-PROFESSIONAL® Food safety products
